

ProtoPixel Spaces App

Overview

ProtoPixel Spaces allows users to easily organise and control lighting from everyday environments like the office, to unique retail experiences that pack a punch.

- Fine-tuning configuration
- Create bespoke user profiles to manage control access
- Use widgets as shortcuts for daily use

System Requirements

An iPhone or iPad with iOS 15 or later.
A mobile phone or tablet with Android.

What You Need

Besides your mobile device, you need to be connected to the same network where your Node with your project or installation is running.

Features

- Control luminaires on Spaces
- Create dynamic Moods
- Control your luminaires
- Generate Rules for Behaviours
- Save your configurations with Widgets
