

## Overview

Our user-friendly mobile app puts all lighting moods and setups in the palm of your hand. You can easily customize the user interface to fit the needs of each customer profile. Use FAQs, contact, and chat modules to take the communication with your customers to the next level.

## System Requirements

An iPhone or iPad with iOS 15 or later.  
A mobile phone or tablet with Android.

## What you need

Besides your mobile device, you need to be connected to the same network where your Brain Experience with your project or installation is running.

## Features

- Control luminaires on Spaces
- Control your luminaires
- See and create behaviours for your elements
- Generate moods
- Interact with dynamic content

## Where to Download
